Topic: Arc Flash Safety During Electrical Commissioning

Description: The safety regulations proscribed by the latest edition of NFPA 70E have made illegal many of the practices that were common during electrical systems startup and commissioning. First energization and testing activities may be the most dangerous periods of electrical system operation. Awareness of those hazards and the latest requirements of the standards involving arc flash will be the subject of this presentation.

Speaker: Mike Mosman, PE
Mike is principal and Vice President of Electrical Engineering at Morrison Hershfield Mission Critical, and has extensive experience designing and commissioning electrical systems for mission critical applications. He is a licensed professional engineer in the State of Maryland and 25 other states.
